

ABSTRACT OF THE DISCLOSURE

5 A display apparatus has an insulating substrate,  
a signal line for transmitting a signal to a pixel  
formed in a display area on the insulating substrate,  
a driver integrated circuit (IC) mounted outside of  
the display area of the insulating substrate and  
electrically connected to the signal line, and an  
inspection pad formed outside of the display area and  
10 electrically connected to the signal line. The  
inspection pad is covered with resin.
